1. Introduction

1-1. Overview

MTB (Multi-function ToolBox) is a total solution for ICT product maintenance. The portable programmer- MTB, presents data in a large LCM makes product maintenance easily and fast. MTB is high convenience that could storage several firmwares at the same time.

Powerful multi functions include programmer, changer operation, IrDA download and sensor calibration. All-in-one design meets all requirements form market.

1-2. Feature

- ◆ Multi-function: Firmware download, Coin Changer(Recycler) operational setting and sensor calibration.
- ◆ Support Coin Changer(Recycler) operational settings, built-in 9 options of operation parameter, effective update function and read audit data
- ◆ High convenience: storage several firmwares at one time.
- ◆ Friendly user interface .
- ◆ Chargeable battery and power saving design.
- ◆ Large screen to show information.
- ◆ Built-in memory and Micro-SD Card slot for large data storage.
- ◆ One multi-purpose cable for different ICT products.
- ◆ Easy to carry.

2. Specification

Power Consumption

Standby	3.7V, 350 mA, 1.30W
Operation	3.7V, 370 mA, 1.40W
Maximum	3.7V, 2 A, 7.40W

Operation environment

Operation Temperature	-5~50°C
Storage Temperature	-20~70°C
Humidity	85% (no condensation)
Battery in charge Temperature	0~45°C
Weight	Approx. 288.5g

3. Dimension

Unit:mm[inch]
3 FIG.01

3-1. Components

4. Installation

4-1. Harnesses Application

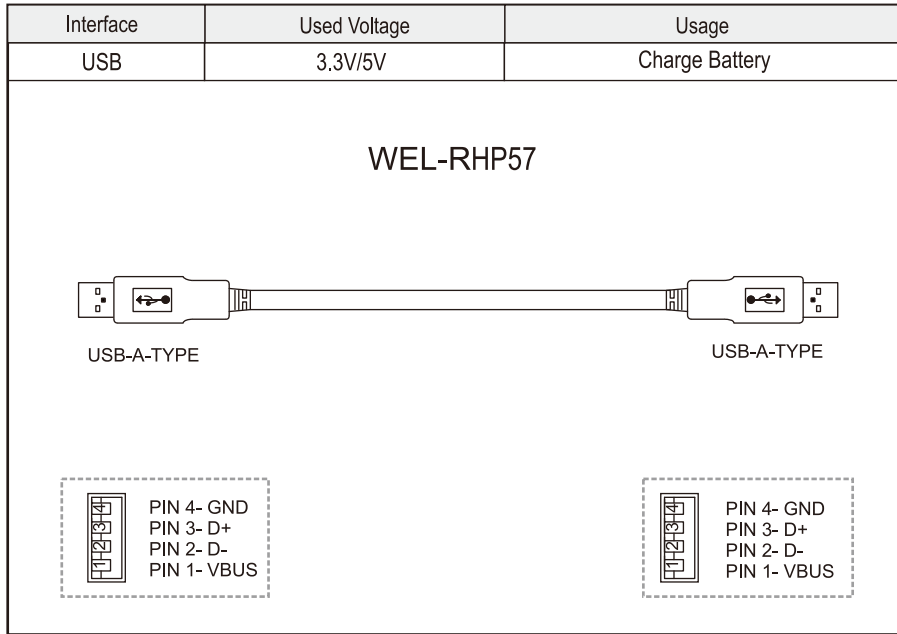

4-1 TABLE.01

Model	Usage	Harnesses	Page
Bill Acceptor A/ V Series, PA7, E77, Envy Series, L Series, PL77, LV77 Series, NBA, NK Series, P Series, S Series, TAO Light, Lockable Stacker Series (V7E, LX7, V77E, TAO-A/V, S7ER)	WEL-RSB09	Download FW & Data Comm.	7
Coin Changer(Recycler) CC6000, CC6100	WEL-RHP57	Charge Battery	8
Others GP58 CR/CA, Mini hopper, CVD	WEL-RHP57	Download FW & Data Comm. & Charge Battery	8
XBA	WEL-RHP57	Download FW & Data Comm. & Charge Battery	8

4-1 FIG.01

4-1 FIG.02

4-2. How to charge battery

4-2-1. Battery Capacity

Li-ion battery: 2100 mAh

For checking battery capacity, LCM displays battery capacity on the main menu.

Battery icon		flash
Capacity	100%	0~1%

When battery low, Status LED displays blink red as well LCM displays low battery. Please charge MTB immediately.

4-2-1 FIG.01

4-2-2. Charge LED indicator

4-2-2 TABLE.01

Charge LED indicator	Description
Red	Charging in process
Turns back to off	Fully charged

4-2-3. Charging procedure

1. Charged by PC

Use WEL-RHP57 to connect MTB and PC.

2. Charged by Adapter

It could be charged by an external adapter as well. The specification of adapter should be DC 5V, 500mA or above.

4-2-4. Battery Notice

MTB's battery should be charged at least once every six months in order to extend battery life.

Working temperature while battery is charging: 0~45°C

Do not use MTB while battery is charging 5V DC charging voltage.

Continues working time: up to 6 hours

Charging time: 4 hours (capacity 0%~100%)

4-3. Getting started (SW1 OFF)

Step 1.

Press ON/ OFF Ⓞ button to wake up MTB and then Status LED turns on.

Step 2.

Press "▲" "▼" to switch pages of Main menu.

Step 3.

Choose one function that you need. Please refer Chapter 3~7 for more function detail.

Changer Operate: Set up Coin Changer(Recycler) operation contents.

Download FW: Download ICT products' firmware as well IrDA Download.

BA Calibration: Calibration devices' sensor.

Auto-sleep: Set MTB interval time to turn sleep mode. (5 or 10 minutes)

Battery & RTC: Check the remaining battery capacity as well set RTC (date & time).

Delete File: Deleted program files SD Card

Language: Select Country Language

Device Info: Read machine program version

Device Setting Passive mode

5. Coin Changer(Recycler) operation setting

5-1. Connection

Step 1. Use WEL-RSB09 to connect MTB and Coin Changer(Recycler).

Step 2. Press "Changer operate" on the page of Main menu.

5-2. Parameter into Coin changer Select Parameter

File => changer:
The parameters set Changer

Changer =>File:
The parameters stored Changer

5-3. Read coin changer's audit data(EVA DTS)

Step 1.
Select "Read Audit Data".

Step 2.
Select transmission.

Step 3.
Choose read-only or read Clear.

6. Download firmware for ICT products

6-1. Connection

6-1-1. Use **WEL-RSB09** to connect MTB and ICT products(BA/CA etc..)

6-1-2. Use **WEL-RHP57** to connect MTB and XBA.

Please refer to 6-3 Steps for XBA download.

6-2. Instruction

Step 1.
Press "**Download FW**" on pages of Main menu.

Step 2.
Select one Model Name to start download.

6-3. Steps for XBA download and DIP switches setting

Step 1.
Use WEL-RHP57 to connect MTB and XBA. Press "**Download FW**" on pages of Main menu.

Step 2.
Select "**BA**" and then press "**XBA**".

```

Update?
(.....firmware
information.....)
Back      Enter
    
```

Step 3.
 Press **"Enter"** to start downloading.
 Press **"Back"** to return the prior page.

```

== Dip Group ==
Outside Dips
Inside Dip
Back      Enter
    
```

Step 4.
 Press **"Outside Dips"** to set up XBA outside dips. Press **"Inside Dips"** to set up XBA inside dips. If no necessary to set up XBA dip switches, please press **"Enter"** to download firmware directly.

```

Outside Dips
1. OFF    2.ON
3. OFF    4.OFF
Back      |      ▼
    
```

Step 5.
 After entering **"Outside Dips"** or **"Inside Dips"**, please press any dips that you want to revise.(ON or OFF)
 Press **"▼"** to set up NO. 5~NO.8 dips.
 Press **"Back"** to return the prior page.

```

Update?
(.....firmware
information.....)
Back      Enter
    
```

Step 6.
 Press **"Enter"** to start download.

```

Check Set Dip?
NO          YES
    
```

Step 7.
 Press **"YES"** to save dip setting into XBA.
 Press **"NO"** not to save dip setting into XBA.

```

(...Firmware information...)
Write FW      .....OK
Verify FW     .....OK
                        Confirm
    
```

Step 8.
 Download successfully and press **"Confirm"** back to prior page.

Download fail shown as below:

```

(...Firmware information...)
Write FW
Download Fail
                        Confirm
    
```

7. Sensor Calibration

7-1. Connection

7-1-1. Use **WEL-RSB09** to connect MTB and ICT products(BA/CA etc..)

7-1-2. Use **WEL-RHP57** to connect MTB and XBA.

7-2. Instruction

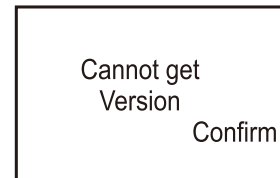

Step 1.
Press "**BA Calibration**" on pages of Main menu.

Step 2.
MTB detect device's model name and firmware information.

MTB couldn't support sensor calibration for some products that might show as below:

Step 3.
Please insert calibration card into device. Sensor calibration is successful as well resets device auto matically.

Sensor calibration is fail.

MTB couldn't support sensor calibration for some products that might show as below:

Step4. Press "**Confirm**" to return the prior page.

8. Battery Capacity & RTC (Battery & RTC)

Step 1.
Press "**Battery & RTC**" on Main menu.

Step 2.
Press "**Set**" to set RTC date and time.

Step 3.
Press "**←**" "**→**" to shift configured digit.
Press "**+**", "**-**" to plus/minus number.
Press "**Save**" to save setting.

9. Connect to Device's PC tool

Step 1.
Turn SW1 to ON status and press "**Reset**".

Step 2. Please install USB Driver.

9 FIG.01

Step 3. Connect device, MTB and PC.
(Use WEL-RHP57 cable to connect MTB and PC)

Step 4. Open device's tool and select visual comport.

Step 5. Download device's firmware.
Press "***COM1**" and "**PROGRAM***" to download device's firmware. If PC tool shows download fail message, please press "***COM2**" & "**PROGRAM***" and try it again.

Step 6. Reset device

Press "* **COM1**" and "**RESET**". If device doesn't reset, please press "**COM2**" & "**RESET**" and try it again.

Step 7. Turn SW1 to OFF status and press "Reset" to back the Main Menu.

10. Download MTB's firmware by pen driver

Step 1.

Please turn off MTB first.

Press "**Confirm**".

Step 2.

Plug in Pen drive.

MTB's firmware in pen driver. Keep pressing button "**E**", then press "**ON/OFF**" button in the same time.

Press "**YES**" to download MTB's firmware.

11. Troubleshooting

11 FIG.01

11 TABLE.01

Status LED indicator	Description
Green	Power on
Blink red	Battery low
Orange	Download in process
Turns back to Green	Download OK
Red	Download NG

11 TABLE.02

Charge LED indicator	Description
Red	Charging in process
Turns back to off	Fully charged
