

How to Update XBA by USB stick

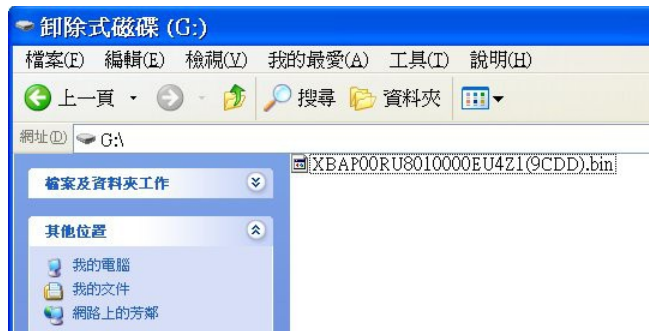

Request:

USB stick x1. 2. XBA x1.

Step1.

Put the firmware into root directory of the folder without other files in USB stick.

(Only 1 firmware is allowed inside)

Step2.

Turn off the power, and then plug USB stick into the USB port of XBA.

Step3.

Power on and wait until the LED flashes 2 times in a regular time, then remove USB stick. (Around 15~20 seconds)

Step4.

After 10~20 seconds, XBA will be reset. (The LED will be off at this moment)

Step5.

When front bezel lights up again, it's done.

Notice:

1. XBA will be reset after the programming finished.
2. After updating, please re-power on the VMC.
